Experience the Difference

Disproimp has been focused on the Agro Industrial Market in Ecuador since 2007. Our humble beginning as producers and distributors of organic fertilizer enables us to better identify with and cater to the needs of our clients. Our ability to deliver quality products has opened the doors to some of the nation's most recognized Agricultural and Floricultural companies. Our technical expertise is what sets us apart, and we attribute our success to our ability to produce products using the highest standards of quality control and state-of-the-art technology. Our management is committed to managed growth, and we take pride in our reputation as a leader in the marketplace.

Reaching our Global Clients

With our Commercial Manager headquartered in Southern California, and a team of Commercial Representatives internationally, Disproimp works seamlessly from the moment the first seed is planted until the exportation is complete. Our representatives are located on both coasts of the U.S., Toronto, Germany, Spain and South Korea. This vast sales network enables us to provide personalized service, while quickly responding to the needs of our customers around the world.

We are referred to as a strong contender in the International Market due to the consistent quality of our products and exceptional service. Recognized and highly promoted by the Offices of Commercial Trade of Ecuador as a Top Exporter we have been honored to be selected to exhibit at International Food Shows such as Natural Products Expo West 2014 & 2015, Winter Fancy Food 2015, FoodEx Japan 2015, Seoul Food & Hotel 2015, and soon at the National Restaurant Association 2015 in Chicago mid-May.

Quinoa, an Ecuadorian Native Grain

Ecuador is the 3rd largest producer of Quinoa in the World. The variety of Quinoa that is NATIVE to Ecuador is called Tunkahuan. A variety that ONLY grows in Ecuador, making it a highly sought after grain with significantly lower saponin levels (less than 1% prior to processing.) This gives us a distinct advantage over our competition, due to limited processing and nutrient conservation.

In the shadow of the Andes Mountains and with a flexibility in growing regions located between 2200-3200 meters above sea level, cultivating on the Equator gives our crops direct sunlight that is enviable. Since Ecuador only has two seasons, its ongoing “Spring-like” weather allows Disproimp to plant and harvest year round. This provides our customers with the highest quality, freshest Quinoa, at a more stable price, without the necessity of stocking.

Producer and Exporter of Agro Industrial Products

From our Farms to your Table

With more than 400 hectares of our own land and long-term agricultural contracts as Producers, we're hands-on from start to finish. Our technical team on our farms and in our processing plant have proudly worked alongside us for many years. As we have continued to grow as a company our team has received expansive training in the necessary and newest technologies yet we remain truly rooted to the value that ancestral cultivating practices hold. Disproimp has successfully created economic stability in our surrounding communities by promoting new opportunities, fair wages and prosperity. With great pride we are Andean Quinoa Growers and sharing our story with our customers as we deliver Quinoa from our hands to your table is truly humbling.

Quality Beyond Assurance

From planting to harvest, we carefully control and monitor all agricultural procedures such as soil analysis, seed selection and land preparation; as well as the planting, management, fertilization, and weed-control of our crops. Our strict agricultural practices dictate that the first harvest is treated with the same high standards as the last.

By producing and growing our own Quinoa, with the entire process of cleaning and packing done in-house, we're able to ensure that our clients receive the best possible quality. Our Quinoa goes through strict processing to control product quality and cleanliness. Providing our clients with a complete certificate of analysis including pesticide screening performed by Bureau Veritas for each lot supporting our promise that all of our Quinoa is 100% pesticide free. Bureau Veritas is also contracted for inspection prior to the loading and exportation of each shipment.
